1/8" to 3/16" Polypropylene overlap

## Astragal Part # 92

This weather strip is designed to fill the space between the meeting stiles of double doors. The polypropylene should overlap between 1/8" to 3/16" as illustrated above.

1. Measure the height of door and cut the two pieces of astragal to equal the height.
2. Fasten one astragal to each face of the individual doors with the screws furnished so as not to interfere with self-closing devices, locks or other hardware.

3. Operate the door several times to ensure the gasketing material is adjusted properly so as not to inhibit the door from self-closing and latching.

**Positive Pressure Tested Gasketing Materials for Fire Doors.** Intended for application to/with listed steel frames and/or classified steel covered composite, hollow metal type fire doors rated up to 3 hours, wood and plastic covered composite type fire doors rated up to 1-1/2 hours, and wood core type fire doors rated up to 20 minutes.

Meets **CAN4-S104-2010**  
Meets **UL10B, UL10C, UL1784,**  
Category **J** Category **H**  
Can use on 'S' Labeled doors.
